ESTUDOS BEM HUMORADOS PARA TROMPETE SOLO BY
FERNANDO MORAIS: AN INTRODUCTION

Gilmar Cavalcante da Silva

Dr. Kenneth Kirk, Faculty Mentor
Department of Music

The purpose of this research was to make known the (V W X G R V % H P + X P R U D G R V S D U D 7 U R P (+ X P R U R X V (W X G H V I R U 6 R O R 7 U X P S H W) (2013), an unpublished collection of 12 short character Brazilian styles by Fernando Morais (b. 1966). The history and current practices of Brazilian trumpet pedagogy were examined, and the Estudos placed within that context and the broader international context. The Estudos % H P + X P R U D G R V S D U D were studied with three reasons. First, they are good music, worthy of study and performance. Second, they can act as a resource to preserve native Brazilian popular styles and to introduce those styles to non-Brazilians. Third, they are pedagogically useful as alternatives to other, better-known, etudes. To support these claims two of the etudes were analyzed in detail.

A PERFORMANCE OF Six Pack for Solo Tuba BY JAMES MEADOR

Curtis L. Thornton

Dr. Daniel Rowland, Faculty Mentor
Department of Music

All too often when people think of tuba playing what comes to mind is marching band or bass lines in marches,

THE EFFECTS OF THE LSVT ON VOCAL QUALITY ON AN ADOLESCENT WITH PARKINSONIAN-LIKE SYMPTOMS

Jade A. Dampier

Dr. Matthew Carter, Faculty Mentor
Department of Communication Sciences and Disorders

The purpose of this study was to assess the effectiveness the LSVT program had on an adolescent's vocal quality that was diagnosed with Parkinsonian like symptoms. The treatment was implemented over the course of three weeks with a total of twelve sessions. During treatment sessions, the participant worked on various

PRESENCE OF PROSODIC DEFICITS IN CHILDREN WITH AUTISM IN
THE ABSENCE OF LINGUISTIC INFORMATION

Kelsey M. Hedman

Drs. Matthew Carter and Lynn Adams, Faculty Mentors
Department of Communication Sciences and Disorders

This study was designed to examine the prosodic abilities of children with autism spectrum disorder (ASD) in the absence of linguistic information. Previous studies have shown that children with ASD commonly exhibit lower-level non-linguistic abilities. Assessing the child's prosodic ability at a more basic level may allow

A NARRATIVE ANALYSIS OF THE IMPACT OF AFRICAN AMERICAN FEMALE COLLEGE PROFESSIONALS' LIFE HISTORIES ON THEIR PERCEPTIONS REGARDING AAVE VERSUS CODE SWITCHING

Elizabeth Gassel Perkins

Drs. Richard Schmertzing and Lorraine Schmertzing, Faculty Mentors
Department of Curriculum, Leadership, and Technology

In an effort to learn how best to work with students who are speakers of African American Vernacular English (AAVE) in the college English composition classroom, this study examines the perceptions of AAVE, Standard education. After conducting interviews, the researcher used thematic narrative analysis to explain how the familial, educational, professional, and societal experiences of the women developed their attitudes toward AAVE and SE. The researcher also conducted a values narrative analysis to examine what was most important to the participants in regards to language use for themselves, their students, and others. Finally, using post-colonial theory, the researcher examines how the responses provided by the participants is problematic, but reconciles these issues within an understanding of the participants' setting and lived experiences.

OUT FROM THE SHADOWS: A COUNTERNARRATIVE OF SUCCESSFUL
AFRICAN AMERICAN MALES IN SCHOOL

Kevin B. Scott

Dr. Richard Schmertzing, Faculty Mentor
Department of Curriculum, Leadership, and Technology

Marriage and Family Therapy

MARRIED COUPLES' EXPERIENCES OF PREMARITAL COUNSELING

Isadora Burnham, Violina Lilova, and Elizabeth Newton

Dr. Jennifer Lambert-Shute, Faculty Mentor
Department of Psychology, Counseling, and Family Therapy

In this study, we sought to explore the ways in which a couple's experience with premarital counseling has impacted their marriage if such an impact exists. Our focus was to unpack the experiences of participants to obtain a better understanding of how attending premarital counseling impacts their relationships and their ideas

RI FRXQVHOLQJ :LOOLDPVRQ 7ULDO %UDGEXU\ DQG .DUQH\

counseling on a couple's later help-seeking behavior and found that couples were more likely to seek counseling later in their marriage if they had attended premarital counseling compared to those who had not. Tambling and Glebova (2013) explored the following themes that impact couples' experiences: who conducts the premarital counseling, the number of sessions required, cost, preferred topics, and the like. In considering

CIVIC EDUCATION IN THE ADVANCED PLACEMENT CLASSROOM

Erin E. Goff

Dr. Julia McKissack, Faculty Mentor
Department of Middle, Secondary, Reading and Deaf Education

Constitutional literacy is low among Americans, and schools are tasked with educating students about civic participation and should be utilized in these efforts. The need to provide a rigorous and also relevant curriculum has increased enrollment in Advanced Placement courses throughout the nation. This study addressed the effects problem based learning (PBL), a student led pedagogical method of presenting a problem for solving before concepts and subject information is taught, had on student achievement, engagement, and attitudes to be greater during PBL instruction than current teacher led best practices instruction. The large effect PBL had on student achievement and behavior illustrates the positive impact this approach has on the opportunity for student learning in advanced classrooms.

EFFECTS OF TARGETED DRILLS ON COMPUTATIONAL FLUENCY FOR FIRST-GRADE STUDENTS

Amber L. Hare

Dr. Ellice P. Martin, Faculty Mentor
Department of Middle, Secondary, Reading and Deaf Education

This study examined the effects of timed targeted drills (TTD) on the math achievement, attitudes toward math, and engagement of first-grade students. Participants participated in 4 weeks of TTD intervention treatment, followed by 4 weeks of TD control treatment. Math achievement was measured using a commercially-available instrument designed to measure computational fluency, and attitudes toward math were measured with an observation checklist. Both instruments were developed by the teacher-researcher. Data were analyzed using descriptive statistics, paired one-tailed t tests, and Cohen's d. Results indicated small, positive effects of TTD on math achievement, but the gains were minimal. As a result, the study was therefore inconclusive. The TTD intervention was an effective intervention, but the gains were minimal. As a result, the study was therefore inconclusive.

EFFECTS OF MULTIFACETED LITERACY INSTRUCTION FOR
MIDDLE SCHOOL ENGLISH/LANGUAGE ARTS LEARNERS WITH
MODERATE INTELLECTUAL DISABILITIES

SOCIAL JUSTICE FRAMEWORK: FAIR SENTENCING ACT OF 2010

Kenyetta T. Hayes

Dr. Phillip Dybicz, Faculty Mentor
Department of Social Work

Congress passed the Anti-Drug Abuse Act of 1986 as a direct response to the increased Cocaine usage and convictions that disproportionately represented minority populations as the culprit. The Fair Sentencing Act of the racial discrimination in drug sentencing. The purpose of this comparative analysis is to make a moral argument utilizing the social justice framework to determine which values (needs, rights, deserts, and equality) are best to guide policy in drug sentencing in order to reduce racial discrimination. The analysis focus on the best values to guide preferred policy to reduce racial discrimination in drug sentencing, are formal equality informed by deserts and moral equality informed by rights. These values are consistent with all of the social work values with special emphasis on service, social justice, and dignity and worth of the person.

THE EFFECTS OF EXERCISE AND MEDITATION ON STRESS AND DEPRESSION FOR SOCIAL WORKERS

Sandra Y. G. Jones

Drs. Hanae Kanno and Mizanur Miah, Faculty Mentors
Department of Social Work

Social workers endure countless hours in environments and with populations at risk that can be both stressful and poverty. From September 21, 2015 - November 16, 2015, I conducted a Single Subject Research Design (SSRD) to improve the stress and depression levels of three social workers working in different positions in this social program: (1) program director, (2) program coordinator, and (3) caseworker; using a multiple baseline track their progress. Guidelines for the exercise or meditation intervention were at least three times per week
