BIOL 4580, Molecular Genetics Spring Semester 2014 Section A (CRN# 21969, 4 Credit hours) Section B (CRN# 21970, 4 Credit hours) Department of Biology, College of Arts & Science, Valdosta State University

Lecture (BC 2022): T & R 2:00 p.m. ±3:15 p.m. Labo ratory (BC 2071): Section A W 1:00 a.m. - 11:50 a.m. Section B W 1:00 p.m. - 3:50 p.m. Instructor : Dr. Brian C. Ring Office: BC 2084 Office hours: T 11:00 a.m. ±12:00 p.m. & R 11:00 a.m. ±12:00 p.m. Phone: 249-4841 (Dept. office 333-5759) Email: bcring@valdosta.edu (please use D2L first , if I can figure it out! )

1) Comprehend the central dogma of molecular biology as illustrated through elegant experimental studies of the phage lambda (BO3, BO4, & GE4, & GE7);

2) Understand how eukaryotic genomes are experimentally investigated using biotechniques such as molecular biology, genomics, gene expression, and transgenics (BO3, BO4, & GE4);
3)

Participation is key to the success of this course. Some lecture will be provided by your instructor, but the majority of the time is left for discussion of the reading assignments collaboratively. Therefore, attendance in this course is mandatory and each missed lecture will result in 5 points lost from your participation grade and missed course time equivalent to greater than 20% (~6 days) will result in a failing grade as per University policy. Attendance may be taken at any time during the lecture or laboratory and used as an indicator of class participation as noted. Laboratories in particular are important not to miss as you will not be able to prepare for lab exams. If you miss more than 2 laboratory sessions you will fail this course as per University policy. In the event that a student will miss a lab, s/he should notify the instructor in writing by email and be prepared to provide documentation of the excused absence. It is W K H L Q V W U X F W R U ¶ V S U H U R J D W LABSONURED/FNIOHLSONUREIS IORHLABORATHORIES CARNW BE "MADE UP."

Laboratory: (150 pts, 30%) Two exams worth 75 points each. Exams are composed of multiple choice and/or short answer covering what we learned in the laboratory. The first lab exam is the practical introduction to molecular genetics chemistry in the lab (labs 1-3). The second lab exam is based on our inquiry into your own genetic profile using the basic molecular genetic skills learned from labs 1-3.

Grade Calculation & Distribution:

TENTATIVE LECTU	JRE & LABORATORY	OUTLINE:

Week:	Date:	Topics:	Text/ Paper:	Laboratory Topic:	
1	Jan. 14 (T) Jan. 16 (R)	Course Introduction & Objectives Central Dogma & Phage Lambda	 Pg. 1-10	Introduction, Safety, & Inquiry Based learning	
2	Jan. 21 (T)	The Master Elements of Control	Chpt. 1	NO LAB - prepare for lab 1 See L1 hand (D2L).	
	Jan. 23 (R)	Continued			
3	Jan. 28 (T)	<ul> <li>Protein-DNA Interactions &amp; Gene Control</li> </ul>		L1: Common Units &	
	Jan. 30 (R)	Continued		- Medoureo-	
4	Feb. 04 (T)	Control Circuits- Setting the Switch	Chpt. 3	L2: Common Stock	
	Feb. 06 (R)	Continued		Solutions	
5	Feb. 11 (T)	Catch-up & Review		L3: Dilution Chemistry	
	Feb. 13 (R)	Lecture Exam 1			
6	Feb. 18 (T)	How Do We Know?- The Key Experiments	Chpt. 4	Lab Exam 1	
	Feb. 20 (R)	Continued			
7	Feb. 25 (T)	2004: New Developments & Review	Chpt. 5	L4: Genomic DNA Isolation-	
	Feb. 27 (R)	Continued		- Chelex extraction (forensic lab technique)	
	Mar. 04 (T)	Catch-up & Review		L5: gDNA Quantification & Experimental Discussion	
8	Mar. 06 (R)	Lecture Exam 2			
	Mar. 06 (R)	Midterm - last day to drop course			
9	Mar. 11 (T)	DNA Replication & Biotechnology I	Paper 1	L6: Human STR PCR Set- up
