BIOL 3200 and 3250 or consent of the instructor (**for 6450:** admission into the graduate program).
General principles of scanning electron microscopy operation and theory with comparison to light and TEM optics in a laboratory intensive environment. Topics include:

approximately 1/3 of the lecture material but each exam is comprehensive and can ask questions from any

the class on April 30, 2014 during the lecture period. A paper copy containing a Title, Abstract, and References section will be required for hand-in at this time also.
