Course Description: This course is the second in a two-part series. In BIOL 2252 we will survey human anatomy and physiological principles with emphasis on the following systems: endocrine, circulatory, lymphatic, respiratory, digestive renal and reproductive. In each system, we will cover the basic structure and function of the components.

Pre-Requisite: Biology 2251, Anatomy & Physiology I

Attendance: MANDATORY! Please note: 1) I do not keep track of attendance. Irresponsible students who do not choose to attend WILL do poorly. 2) Disruptive students will be asked to leave. 3) **NO** electronics or associated earpieces are allowed in **lecture or laboratory**. Interacting with cellphones or other electronics during a quiz or exam will be treated as an instance of **CHEATING**. 4) Those wishing to use laptop computers as part of the class are required to sit in the first row of the classroom. Viewing anything other than BIOL 2652 coursework on a computer during course time is prohibited. Any of these violations may result in the loss of one **LETTER GRADE** from your final grade. Students missing 20% of the lectures will receive a grade of “F” **regardless** of standing.

Students with Documented Disabilities: I would like to teach everyone; Students needing accommodations should contact me at the beginning of the semester. Students may need to register with the Access Office for Students with Disabilities (UC Entrance 5, Room 4136, Phone: 245-2498).
